

spread the word, save dogs' lives!

Every year, countless pets die in hot cars, yet too many people remain unaware that the temperature inside a vehicle can soar to dangerous levels in minutes — even on a relatively cool day.

how long does it take for a car to get hot?

vehicle temperature

outside F°	inside F°	
	10 mins	30 mins
70°	89°	104°
75°	94°	109°
80°	99°	114°
85°	104°	119°
90°	109°	124°
95°	114°	129°

Even in the shade, the temperature in the car can still soar quickly to *dangerous levels.*

Leaving the windows open has *little effect* on how hot it is inside the car.
